

Summary:

Product leader specializing in AI-powered platforms, data infrastructure, and experimentation systems that drive measurable business impact. Track record of building 0→1 products and optimizing platforms for growth, delivering \$10M+ in revenue, \$5M+ in cost savings, and 5X improvements in experimentation velocity. Expert in translating technical requirements into strategic roadmaps while partnering across engineering, data science, and GTM teams.

Professional Experience

Staff Product Manager, AI & Data Products | Foodsmart, San Francisco, CA | June 2025 – December 2025

Owned strategy and execution for analytics, and AI-powered decision systems supporting operations, revenue workflows, and internal engineering teams.

- Launched **AI-powered autonomous calling system** for onboarding and scheduling, projected to save \$3.5M annually while increasing call volume 40% and improving conversion rates
- Shipped **self-serve analytics platform** (Member 360) integrating behavioral data and ML-based scoring to empower operations teams, driving 22% reactivation of inactive members and 18% conversion improvement
- Shipped **real-time AI translation** for live consultations using NLP, eliminating \$1.8M in annual interpretation costs while improving care accessibility and quality
- Delivered **AI-assisted clinical charting** using NLP, improving productivity by 40% and reducing documentation time
- Deployed **predictive attendance models** optimizing outreach prioritization and reducing call-center costs by 25%

Data Product Consultant | Independent, San Francisco, CA | November 2023 – June 2025

Advised 4 early-stage startups on building scalable analytics infrastructure and experimentation design, reducing reporting discrepancies by 35% and establishing single source of truth for business metrics

- Built **AI-powered forecasting** and validation tools using NLP, enabling probabilistic scenario planning
- Established experimentation frameworks enabling clients to run 3X more tests with higher statistical confidence

Sr. Product Manager, Product Strategy & Analytics | Malwarebytes, Santa Clara, CA | September 2020 – November 2023

- Built ML-powered churn prevention platform integrated into CX tools, enabling proactive outreach that increased B2B retention 13% within 3 months and prevented \$2M+ in ARR churn
- Led cross-functional teams to build **AI-powered onboarding guides** and chatbot using NLP, boosting new user deployment by 20% and reducing support ticket volume 15%
- Co-developed a new **customer-facing security score dashboard** with 1-click CTAs, driving 10 basis point improvement in aggregate security posture across customer base
- Converted 11% of free-tier users to paid customers through product telemetry analysis and targeted interventions, generating \$3M+ in incremental annual bookings

Sr. Product Manager, Data Platform | Malwarebytes, Santa Clara, CA | September 2020 – November 2022

Owned roadmap for a centralized enterprise data and experimentation platform powering analytics, A/B testing, and executive reporting.

- Built self-serve experimentation platform that increased A/B test velocity 5X while enforcing statistical validity and data quality standards, enabling product teams to ship 40+ validated experiments annually vs. 8 previously
- Implemented data governance, lifecycle management, and analytics infrastructure on AWS and Snowflake, reducing reporting errors 65% and lowering storage costs 25% (\$400K annual savings)
- Established analytics layer using dbt and created executive dashboards in Tableau/Looker, becoming single source of truth for C-suite decision-making across product, sales, and marketing

Sr. Associate, Product Management | Tredence Inc., San Jose, CA | July 2019 – September 2020

Led AI/ML-driven analytics products focused on segmentation, forecasting, and performance validation for enterprise clients.

- Delivered executive analytics platforms validating product and GTM strategy, influencing \$50M+ investment decisions
- Drove 11% increase in client bookings and 8% revenue lift through data-backed recommendations

Product Strategy & Analytics | MobilityWare, Irvine, CA | July 2017 – March 2019

- Enhanced user navigation and optimized in-app store pricing through machine learning algorithms and A/B testing, resulting in a **\$2M increase in annual revenue** and improved player retention.
- Delivered critical insights to leadership, helping define KPIs and core features for a strategic roadmap that **increased engagement by 15%**.

Early Career Experience (pre-2017) - Developed analytical skills along with experiences in process improvement & team leadership.

- YP.com | YellowPages.com LLC:** Developed pricing strategies aligned with customer value delivery, driving **\$1.5M** in annual revenue.
- The Walt Disney Company:** Automated data visualization processes using SQL and Tableau, reducing reporting time by **30%**.
- Micro Labs Limited:** Managed supply chain analytics, driving **\$7M** in sales by optimizing inventory levels.
- Ernst & Young (EY):** Conducted financial risk assessments (derivative valuation) for global clients, delivering timely risk insights.

Education

USC Marshall Business School Master of Science - Business Analytics	Los Angeles, CA, USA December 2015
Indian School of Business (ISB) Executive Program in Business Analytics	Hyderabad, India August 2014
RV College of Engineering Visvesvaraya Technological University Bachelor of Engineering - Industrial Engineering & Management	Bangalore, India August 2009

Core Competencies

- AI & Data Platform Strategy** | Experimentation Design | ROI & KPI Frameworks for Product Adoption | API | GTM Enablement | Analytics Platforms & Measurement Systems | A/B Testing | Product Led Growth | Cross-Functional Leadership | Executive Communication
- Tools & Tech:** SQL · Python · R · Tableau · Snowflake · AWS · Amplitude · Airflow · Looker · Cursor · Salesforce · Pendo · Figma
- Certifications:** PMC Level II - Product Management & Product Marketing (Pragmatic Institute), Generative AI Fundamentals & Applying AI Principles (Google Cloud), Data Science in Python (UMich), Data Visualization and Communication with Tableau (Duke University), Digital Product Management: (University of Virginia), Advanced Google Analytics
